

LUMINOSO

Powered by Consultex

In-house fabric pre-treatment for digital printing

FABRIC TREATMENT SYSTEMS

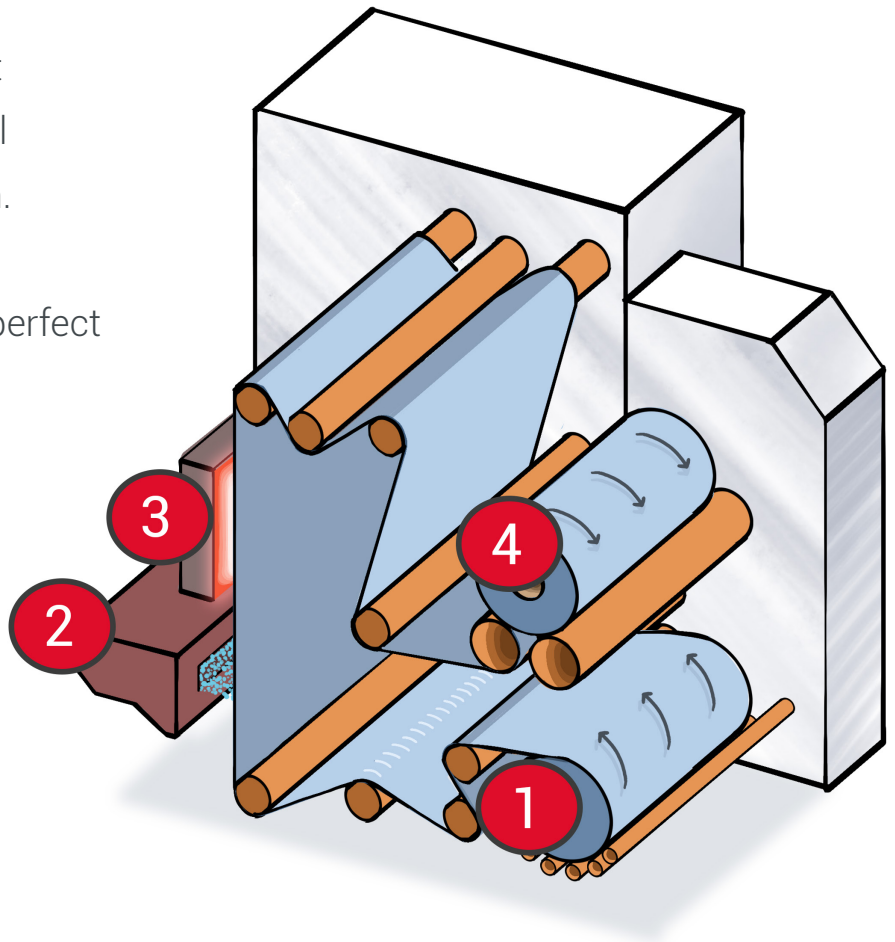

Let your digital designs and color patterns be reflected accurately on your fabrics. Realize maximized color distribution, sharpened design lines, and enhanced hues & color gamut. Produce brilliant, vibrant printed fabrics.

USER FRIENDLY

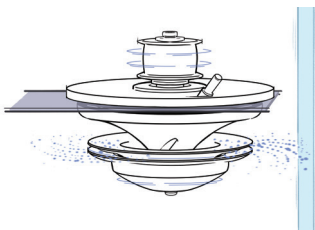

Easy to use / Responsive / Flexible. Luminoso is designed for short runs

ENGINEERING

Luminoso provides a solution that works seamlessly with your digital printing process and fabric design. Powered by Consultex, the pre-treatment spray system sets the perfect canvas for your custom designs, rendering them true to form when applied to the fabric.

1. Untreated Fabric
2. Spray Module
3. Drying Module
4. Treated Fabric

Consultex Rotor Sprayer

- Small footprint
- Easy operation via touchscreen controls
- Fast-response in-house preparation
- Eliminate outsourced pre-treatment
- Cost effective machinery for short runs
- Industry 4.0 ready
