

PRODUCT RELEASE

October 10, 2019

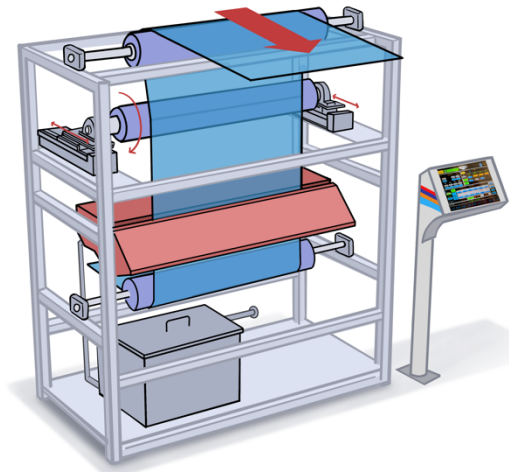

Consultex Systems will be exhibiting at the K-Show in Dusseldorf Germany - October 16 to 23. The K-show, held tri-annually, is the most important international innovation platform for the plastics and rubber industries.

Consultex Systems builds coating / chemical application solutions especially suited for plastic film & sheet. Typical applications are anti-fog, anti-static, silicone, ceramic polymer chemistries used throughout packaging, electronics, battery, and agricultural industries

The Chemica IQ-41 system will be prominently displayed featuring:

- Precision Contact Free Application
- Programmable Add-on Rates
Automatically Adjust to Speed
Changes
- Zero Wasted Chemicals
- Single or Dual Side Application
- Widths up to 8,000 mm.
- Small In-line footprint (<1 m)
- Smoothing Technology

The Consultex Applicator can be used in conjunction with multi-device biax or blown-film lines; or, as a stand-alone offline coating system. Because of its small footprint, it is easily retrofittable into existing lines. Turnkey systems also are available.

Visit stand H13/B91-25 (in US pavilion) where application engineers can answer questions regarding specific processes. A pilot line at company headquarters is available for suitability trials.

Like all Navis Tubetex Technologies, Consultex Applicators are all Industry 4.0 compliant.

Consultex Systems is a brand by Navis Tubetex based in Lexington NC, USA with sales, service and manufacturing facilities worldwide.
